

ALOE VERA PLUS

Used worldwide in beverages and traditional remedies, the soothing Aloe Vera plant has been enjoyed - both topically and internally – for about 4000 years to support health, stamina and vitality. As the name implies, Aloe Vera Plus goes beyond providing only the benefits of Aloe Vera by including the herbal benefits of nature's energiser, ginseng as well as chamomile to calm and relax. The effects of herbs and aloe tended to be a mystery of nature, but research is beginning to validate many traditional uses of this succulent plant as well as herbal extracts. This combination in Aloe Vera Plus is a delicious and refreshing way to revitalise you so that you can best meet the mental and physical challenges of your day.

Why an Aloe Vera Beverage?

- Aloe vera has been safely used worldwide for about 4000 years to support health and vitality.
- In an effort to deal with some of the challenges associated with modern lifestyles, people are again turning to nature for the refreshing benefits of the Aloe Vera plant.

Why NeoLife's Aloe Vera Plus?

- Finest Aloe Vera juice containing the highest quality imported Aloe Vera.
- "Gel only" filleting process keeps aloe polysaccharides intact for maximum benefit.
- Special Herbal Tea Blend that includes energising ginseng and calming and relaxing chamomile
- "Glycaemic edge" beverage, sweetened with fructose for quick and sustained energy.
- Great, refreshing flavour. Pleasant tasting aloe gel, delicious herbal tea blend, fragrant citrus flavour and one of nature's sweetening agents, add up to a great taste.
- Guaranteed purity, potency and freshness.

The mystery of Aloe Vera

So-called "folk" remedies have proliferated throughout the many ages of mankind. In fact, almost the entire development of what we now refer to as "modern" medicine has taken place in the last two centuries, and most of that in the past fifty years. Two hundred years of giant strides have unquestionably lengthened life expectancies and provided many preventive solutions to age-old maladies.

But, somehow the human species has survived, and often thrived, for thousands of centuries without the benefits of "modern" medicine. How could that occur? Because nature, which provides man with materials for nutrition (food), materials for shelter (wood, mud, stone, etc.)... materials, in fact, for every aspect of life (water, air, sunlight, etc.), also provides man with materials for renewal and rebuilding (penicillin, for example, may be refined and processed from simple bread moulds).

It is highly probable that the Aloe Vera plant of today differs very little from its form when dinosaurs roamed the earth. It is speculation, of course, but it is not too difficult to imagine early man gratefully rubbing the Aloe Vera juice on the badly damaged skin he must certainly have suffered in his first fumbling attempts to master the use of fire. Somehow, a belief in the properties of Aloe Vera has apparently followed mankind throughout the time of his reign on earth - all the way to the present.

Aloe Vera users today acclaim an almost unlimited variety of applications. What is the truth about Aloe Vera?

The truth is - nobody really knows. The "mystery" of Aloe Vera remains a scientific riddle after centuries of intensely concentrated research in many countries all over the world. Yet, ever-greater numbers of people swear by it for relief of a wide variety of ailments and general restoration of vitality in old, tired bodies, and the like. Does it work? For thousands of years millions have thought so... yet the mystery remains.

ALOE VERA PLUS

NeoLife makes no claims for the functions of NeoLife Aloe Vera Plus beyond its exceptional purity, safety and consistency. NeoLife quite frankly does not know how, or if, Aloe Vera can be so widely beneficial. But NeoLife researchers have painstakingly processed this wholly naturally occurring product and added herbal extracts of Chamomile and Ginseng, all used and cherished throughout man's history. The NeoLife name and reputation was then put behind it - even though there is very little hard laboratory evidence to substantiate the myriad of claims made by millions of users over a period of many recorded centuries. Why? Because there is absolutely no hard evidence to refute those claims. And every once in a while - rarely - the tides of scientific acceptance are turned by the tidal wave of public acceptance.

NeoLife's Aloe Vera Plus. It just might make you a believer!

People often try to solve their physical and mental problems created by day-to-day pressures by turning to alcohol and drugs. The medical community tries to solve this situation by recommending prescriptions for various drugs. This can often lead to the greater problem of drug dependency.

Today, people around the world are turning, as they have for centuries, to naturally occurring Aloe Vera products in an effort to deal with some of the negative elements associated with modern lifestyles.

Knowing this to be the case and knowing of Aloe Vera's illustrious history, NeoLife has applied that knowledge and developed NeoLife Aloe Vera Plus. But, as the name implies, this product goes beyond providing the benefits of Aloe Vera by including herbs for their folkloric benefits and fructose to offer quick energy. Aloe Vera Plus is specially formulated and targeted to help your body overcome the impact brought on by today's active lifestyle.
